Kuhn Grassland

Take a closer look at the Kuhn stock we have coming in soon. 0% finance is available on selected models until 30th April 2014 - talk to your local sales rep to find out more.

Mowers

PZ170 and PZ190 - Reliable and economical the PZ170 and PZ190 drum mowers provide high-quality technology and working widths from 1.65 to 2.10 m. The KUHN drum mower is suitable for small to medium-sized farms. These models are equipped with 2 flat sided drums and rotating saucers.

GMD 66 - Rear three-point mounted mowers - oval discs - compact, protected mower unit - ground pressure adjustment spring - compact unit for transport - tried and tested reliability.

Mower conditioners

FC 243 and FC283 - Rear 3-point hitch mounted - Conditioning rotor with nylon fingers or pivoting steel fingers or rubber rollers, offering numerous adjustment possibilities - Non-Stop safety release activated by pivoting the mowing unit rearwards - Reinforced disc cutterbar - Central articulation and LIFT CONTROL®

FC302G - GYRODINE pivoting headstock - renown cutterbar of outstanding reliability - free swinging finger conditioner and comb or roller conditioner for delicate crops - wide adjustment range of the swath width.

Tedders

GF502 - Pivoting 3-point attachment - rotors driven by DIGIDRIVE® case hardened forged steel multiple finger coupling - articulated frame for perfect adaptation to ground unevenness - Vertical hydraulic folding - 180° folding of the outer rotors for reduced transport and storage dimensions.

GF6502 - Small diameter rotors for excellent tedding quality and fast drying - Rotor driven by DIGIDRIVE® finger couplings - High capacity gearbox requiring no maintenance - Easy pitch angle adjustment - Maximum compactness for transport - high level of equipment.

Watch the GF series in action

Haybob 300 - The central delivery Haybob 300 and side delivery Haybob 360 tedder-rake combinations have adjustable tines that are kept in the horizontal working position by centrifugal force. The tines float through the stubble to move all the crop. To switch from tedding to raking you need to reposition the adjustable tines, swing the crop deflectors and adjust the wheels. Thanks to the pivoting headstock the machine locks when lifted.

Rakes

GA4321 - Three-point mounted - pivoting headstock with dampener - wide axle - fully enclosed MASTERDRIVE gearbox - tangential tine arm / cam track operation - removable tine arms reduce the space requirement for transport and storage - high number of tine arms and tines per arm - swath deflector arm mounted on a parallelogram frame.

GA4521 - 3-point hitch mounted - Pivoting headstock with dampener - Wide wheel axles - MASTERDRIVE gearboxes - Tangential tine arm operation - Removable tine arms for minimum overall dimensions for transport and storage - Large number of tine arms and tines per arm.

GA6501 - 2-point semi-mounted - 2 rotors with central delivery - adjustable working width - 3D suspension of the rotors - high number of tine arms - tangential tine arm/cam track operation - fully enclosed gearboxes .

GA7501 - 2 point semi-mounted hitch - high yield - variable working width - large number of tine arms - tangential drive tine arms - completely enclosed gearboxes - contour following using bogie axles or 3D articulation - user-friendly adjustment of raking height using crank handles.

See the GA 7501 in action

Shredders

VKM 280 - Shredder with horizontal axis - Multipurpose shredder for vine shoots, wood prunings, brushwood, topping work and grass - Helical rotor fitted with forged hammer knives - Two counter-blades standard - Collecting harrow optional - Compact machine - Low build and rounded profiles.

BPR 305 - Shredder with horizontal axis - Multiple purpose shredder for vine shoots, prunings, brushwood, pasture land and grass - Front or rear mount - helical rotor fitted with forged hammer knives - two counter-knives as standard.

TL 150 - Ideally suited to cutting grass and for landscape maintenance - Machine can be adapted for use on reverse drive station tractors - Adapted to low power tractors - two types of knives available (pallet knives or universal knives) - Height control by roller.

Fertilisers

40.1 Axis Fertiliser spinner - Even more precision with the AXIS 40.1 H EMC - The hydraulic disc drive is independent of the engine speed: fertilizer distribution respected, lower engine speed for fuel saving, border on the left or the right, adjustable working width.

For full details on these machines, please visit www.kuhn.co.uk

Chainsaw Training

10% off a new Stihl chainsaw or Stihl safety kit if you provide evidence of completing an accredited chainsaw course. If you haven't been on a course yet, get 10% of a course with Atlas Tree Care when you buy a new Stihl chainsaw from C&O. Ask your local depot for details.

C & O NEWS

Congratulations to Allister Bone from our Blandford Parts department and Dan Colborne from Wilton Parts department who have both achieved the 'CNH Certified Parts Counter' award. This was a new standard, launched by CNH in 2013 and C&O are the first dealer in the country to have two staff qualified at this level.
