Upgraded T8 launched at LAMMA 2015

At this year's LAMMA show at the East of England showground in Peterborough New Holland launched an upgrade on the T8 series of tractors. The range has been upgraded with ECOBlue Hi-eSCR technology ensuring that they meet the Tier 4B emissions standards. The entire range is more powerful than its predecessor and has maintained excellent fuel efficiency. The upgrade also introduces a host of improvements to driver comfort and convenience, with enhancements for machine setting and maintenance.

New Holland UK and ROI Marketing Manager Nicolas Ferrara said: "After a year celebrating the 50th anniversary of New Holland's Basildon tractor factory, 2015 is our opportunity to build on that proud heritage and show why we lead the world in innovation, design and customer satisfaction.

"The LAMMA show is a great way to begin what is sure to be another memorable year for the brand which will also see New Holland Agriculture take its place as an official global sponsor at the World Expo in Milan between May and October. The international spotlight will be on New Holland as a global clean energy leader."

Together with the contractor's choice high horsepower T8, New Holland stand at LAMMA also featured the British-made T6 and T7 series, the livestock favourites T4, T4 Powerstar, T5 models and the TD5 tractors with the all new Tier 4 engine.
