NEW HOLLAND LAUNCH T7.225, T7.290 AND AWARD WINNING T7.315

Alongside the heavy duty T7.290 and T7.315 and the standard wheel base T7.225 the entire New Holland T7, T8 and T9 ranges are now fully Tier 4B compliant. The new machines were unveiled at New Holland's 'Heavy Metal' launch and Agritechnica. C&O Tractors will be getting a demo T7.225 Blue Power in 2016 – contact your rep about booking a demonstration.

New T7.290 and T7.315 Tractors Deliver Heavy Duty High-Powered Performance with Class Leading Efficiency

New Holland has launched two new flagship heavy duty tractors. The T7.290 and T7.315 were launched to the world at Agritechnica, where the T7.315 was awarded the prestigious Tractor of the Year 2016 award, and launched to UK dealers and customers at a recent event at New Holland's UK tractor plant in Basildon.

The machines are built to respond to the need for increased power, versatility to perform a wide range of field jobs, including primary and secondary cultivations, drilling, baling and mowing as well as haulage tasks.

The Horizon cab provides a quiet and supremely comfortable operating environment, along with precision technology that enables growers to optimize efficiency and performance, while staying connected with their entire farming operation. These new models also feature New Holland's revolutionary IntelliCruise™ tractor-baler automation that allows the New Holland BigBaler to control the tractor's speed according to changes in the windrow to maximise productivity and bale consistency.

"These new models are perfect for farming operations that need the power of a large-frame tractor with the versatility of a medium-frame unit," explained Sean Lennon, New Holland's Head of Tractors. "They can take on tasks that you would usually associate with a larger tractor while having the features to deliver great efficiency for PTO implements and transport

work. They are ideal for farms and contractors whose tractors have to multi task."

High power, responsiveness and efficiency

A fundamental design input of the T7.290 and T7.315 was to improve vehicle efficiency to new levels. The engine features New Holland's ECOBlue™ Hi-eSCR (High-Efficiency Selective Catalytic Reduction) technology to meet Tier 4B emissions standards. These new T7 series models also feature New Holland's award-winning Auto Command™ continuously variable transmission (CVT) with four direct drive points with 100% mechanical efficiency. For PTO work these new T7s lead the field. A four speed rear PTO and a two speed front PTO allow the engine to be operated as efficiently as possible.

Excellent manoeuvrability, traction and soil protection

The two new T7 models can mount larger group 48 and 49 tyres (2050mm and 2170mm diameters) with a rear tyre width up to 900mm. This results in excellent traction and, most importantly, minimal soil compaction.

Leading edge connectivity that maximises productivity and efficiency

The T7.290 and T7.315 automation features, such as the latest generation Headland Turn Sequencing, IntelliSteer auto guidance and PLM™ Connect telematics, put the driver in full control of the tractor. The new models also feature New Holland's IntelliCruise™ ISOBUS Class 3 tractor-baler automation technology that enables the baler to control the tractor's speed to optimise feed rate and produce constant flake thickness.

New Holland LM 7.42 demonstration telehandler now at C&O. Contact your local sales team to book a demo.

Winter Checks for your Tractors and Machinery

With winter upon us it's time to remember a couple of important jobs this month to ensure your machines don't miss a beat as the mercury falls.

Check your anti-freeze - it's best to have your engines protected up to -10°C, a simple test using a glycol tester will tell you if your coolant will do its job in the harshest of winters. By using the correct anti-freeze you not only stop the risk of the coolant freezing but as the anti-freeze contains corrosion inhibiting properties you protect the system from the inside.

Check your batteries - the last thing you want on a cold morning is the tractor not to start with a poor performing battery. A very simple test and you can ensure there's life in the machine's batteries to give it the starting performance you need. Checking the fluid levels within the battery cells and terminals is the first thing to check. You can use a heavy duty discharge tester to ensure the battery cells are in good shape.

Should you need any help please do not hesitate to contact your local C&O Tractors service departments for advice. We are here to help look after your most important machines on and around the farm, keeping them working, saving you time and money.

C&O Construction

C&O Tractors are expanding our commitment to selling construction machinery with the appointment of a new Construction Sales Manager. Allan Feltham brings to C&O a wealth of experience from the construction machinery sector and can be contacted directly regarding New Holland Construction, Wacker Neuson construction machinery and Merlo construction telehandlers on 07908 262 833 or by email at allan.feltham@candottractors.co.uk

TRACTOR VOUCHER

Offer closes
31st December 15

Purchase a New Holland combine harvester before 31st December 2015 and receive two tractor vouchers worth up to £10,000 and valid for 12 months. Talk to your local C&O salesman for full details.
