HARVEST REVIEW

During July and August C&O Tractors two Massey Ferguson combine harvesters have been in action across our territory.

The Beta 7370 6 straw walker combine and Delta 9380 AL hybrid model both benefit from the unique Massey Ferguson paralevel system which gives great performance on steep ground and keeps the cab level for the driver.

The first new Massey Ferguson tractors have been delivered to customers with Richard Drake receiving a MF6715S and Walford Farm, Wimborne a MF6718S from C&O Blandford. MF7716 and MF7720 delivered by C&O Wilton to Allenford Farms and Adgestone Vineyard on the Isle of Wight taking delivery of a MF3630V vineyard tractor.

More 'safer dumpers' from  C&O Construction

C&O Construction's Allan Feltham with Neil Stubbington Managing Director of Baram Groundworks.

C&O Construction have handed over 9 Wacker Neuson DW90 forward tipping dumpers to Nas Plant, part of the Baram Construction group. The units have been fitted by C&O with innovative features making them the safest dumpers available in the UK. The machines have been fitted up to the new safety standards by C&O Construction.

The new dumpers have air conditioned cabs with a secondary operator protection systems so the operators can stay in the cab during loading, eliminating the potential for slips, trips and falls whilst mounting and dismounting a traditional dumper, it also means the operator is more focused and aware of their tasks and surroundings whilst staying placed in the cab. The new dumpers also boast forward and reverse colour cameras on an 8 inch screen in the cab and a radar system, which

now means there is zero blind spots around the vehicle, in addition the cab has a high back seat with a four point harness type seat belt.

Keeping the driver safe within a cab also delivers massive productivity benefits, reducing an average fill time from 10 minutes to just 4 minutes – a production increase of 140%. The Trackunit card swipe system to ensures only users with activated cards can start the dumper, in addition the system also runs any activity report required, a geo fence system to notify site managers if the plant ventures into an area of restriction and isolators.

The new units are now in action with Nas Plant on housebuilding sites across the south coast.

Join the team from C&O Funtington
for a **CULTIVATION DEMO DAY**

Thursday 21st September, 10am-4pm

Oldwick Farm, West Stoke Road, Lavant, nr Chichester, PO18 9AA

Drive a range of Massey Ferguson tractors and cultivation machinery from Kverneland. Isuzu pick-up trucks will be on show, alongside a range of Shelbourne Reynolds hedgecutters and representatives from Michelin.

Food and refreshments will be available throughout the day.
