Wacker Neuson Award for C&O Construction

C&O Construction are very proud to have been awarded Wacker Neuson UK Dealer of the Year award for our Dumper Sales.

During 2017 C&O Construction worked closely with Wacker Neuson and Tonic Construction to drive forward the development and delivery of the new safety forward tipping dumper to the UK market. The Wacker Neuson safety dumpers with cabs are now working on construction sites across the West, with Tonic Construction, Baram Construction and Ford Civil Engineering leading the market with their use of the vehicles.

C&O Group Managing Director Andy Coles said; 'This award is great recognition for the effort put in by the team at C&O Construction. They have worked hard to drive forward the whole Wacker Neuson range since C&O took on the dealership in 2016. I'm really proud that C&O has been involved in the development of the new safety dumper and the fact the industry is starting to accept these new standards is very satisfying.'

The C&O Construction Sales team of Allan Feltham, Lee Priddle and Philip Prior are looking forward to another great year with Wacker Neuson, delivering dumpers across the whole range from 1 to 10 tonnes.

Mzuri Innovation Rewarded at LAMMA

British manufacturer Mzuri Ltd returned from LAMMA with the prestigious Best Product of Innovation for the Environment for the Pro-Til Xzact striptill precision seeder. The high standard of engineering and innovation of the Pro-Til Xzact was further acknowledged by the judges with the product going on to become the Overall Winner of the Awards and receiving the David Baggaley Memorial Cup.

Marking a huge advance in seeding technology, the innovative Mzuri Pro-Til Xzact combines a striptill drill and a precision seeder in just one piece of equipment, meaning that one drill can now seed all types of arable and precision crops in a single pass.

Pro-Til Xzact delivers exceptional seeding accuracy, typically awarded by conventional precision seeding drills, in a form of a single pass drill. The precision striptill approach eliminates ploughing and power-harrowing operations which are widely recognised as huge contributors to erosion and loss of moisture.

Mzuri's second entry at LAMMA, the Razorback self-levelling rotary hedgecutter, was also recognised with a Certificate of Merit in the 'Best Product or Innovation in Technology' category.
