**C&O work with IOW firm  
to build new  
Swath Roller**

C&O's Isle of Wight team been working closely with local engineering firm A.J. Wells & Son to develop a new Swath Roller. The new tool sees A.J. Wells & Son return to their heritage in building agricultural machinery. The Swath Roller squashes the tall swath now produced by the new higher spec combines and rakes, avoiding problems with straw and grass build up underneath tractors.

The Roller has been tested on the Isle of Wight and the development team are now looking for farmers and contractors to test and provide feedback on the tool - available in two sizes - throughout the 2020 harvest.

Talk to Lee Priddle at C&O Isle of Wight depot on 01983 524413 to find out more - demos available on IOW or mainland. See the Swath Roller in action in silage earlier this year at [www.youtube.com/candottractorsltd](http://www.youtube.com/candottractorsltd)
