WELCOME TO THE NEW FORMAT C&O FOCUS

2022 has been an exciting year for C&O as we celebrated 5 years of our partnership with Massey Ferguson and saw our operating area expand to cover Somerset and Devon. We've had new apprentices join our workshops in Somerset and Wiltshire and have more new starters joining us in the new year. In 2023 we are looking forward to getting to know more of our new customers in the West and building on existing relationships with customers across our whole region.

As we look into 2023 C&O are taking the opportunity to update our customer communications. We're moving on from a monthly newsletter to bring you FOCUS, our quarterly update on C&O, our manufacturers and their products.

Your C&O sales representatives will deliver FOCUS to you on farm, and you'll be able to read it online, but if you'd like to have a copy posted to you please let us know. **Scan this code** to update your contact preferences.

MF 5S MAINTAINS AWARD WINNING STREAK

The MF 5S series has won another accolade, at the SIMA show in Paris the model was awarded Farm Machine 2023 in the sub 120hp category, with judges impressed with the best in class visibility, industry leading 4m turning radius, the narrowest steep-nosed bonnet and a slew of practical features.

The MF 5S Series are supreme loader tractors, with optional front axle suspension, a high payload and greater linkage capacity, it performs in the field and on the road.

TRY THE MF5S

We've got an MF 5S.145 demonstration model ready for you to try today, as well as loader ready, Dyna 4, 5S.125, 5S.135 and 5S.145 tractors in stock.

NEW TRACTORS

- 0% Finance packages available on new tractors in stock
- 80-400hp tractors available now
- Add up to 5 years extended warranty
- Tractors in stock now
- Buy now - On farm in Jan 2023

See [page 11](#) for more new tractors in stock

DEMO TRACTORS

- MF 4709M
- MF 5711M
- MF 5S.145 Dyna 4
- MF 6S.165 Dyna 6
- MF 7S.190 DVT
- MF 8S.245 E Power
- MF 8S.245 DVT
- MF 8S.285 DVT
- MF TH.6534 Telehandler

A new Product Support Specialist Richard Martin has joined C&O to support the sales team with demonstrations and machine installations. Richard comes to C&O with a wealth of farming experience from his 5 years spent working in Dorset and previous roles working on farms in Australia, New Zealand and East Anglia.

USED AND EX-HIRE

- Great selection of quality used tractors
- High hp low hours ex-hire tractors available
- New ex-hire tractors due in early 2023

The Mzuri approach is designed around maintaining healthy soil, delivering consistent crops, straw management and future-proof farming.

The Mzuri range of **direct drills** can carry out multiple operations, eliminating unnecessary steps and saving time and fuel. Prepare your seedbed, fertilise, drill and reconsolidate in a single pass.

The Pro-till drill comes in 3, 4 or 6m trailed models and 3m mounted version. Extra options are available, including the Select Series gives you more flexibility with row spacing, Xzact seed singulating metering system.

The Mzuri IPASS has been specifically designed to offer high output, efficient low disturbance seeding direct into stubble and cover crops, while retaining its ability to drill into cultivated ground.

mzuri.eu

Kverneland offer an unparalleled range of conventional drill designed to deliver optimum seed distribution and seed placement.

The OPTIMA range of **pneumatic precision drills** give customers a range of solid, cost efficient solutions, whilst the straight forward designs are capable of supporting the biggest arable operations with high levels of consistent precision.

Kverneland's MONOPILL with **mechanical precision drills** and MONOPILL e-drive II with

electrical drive are designed for professional precision drilling of beet, rape and chicory. With the Monopill, the peripheral speed of the seed disc matches exactly the forward speed of the machine; therefore the seed has "zero speed effect" which eliminates seed bounce.

The **mounted seed drill** range includes the popular F-Drill and E-Drills enable active seed bed preparation, consolidation and seed placement in one pass as well as the application of seed and fertiliser. The range also includes the DF-1&2 models with flexible front-mounted hoppers and for conventional and precision sowing and the tine seeder TS-Drill, designed to work in the most extreme conditions whilst fitting into conventional and conservation tillage systems.

For **trailed seed drills** Kverneland's U-Drill gives high performance and operator convenience with low weight and relatively low pulling force, plus the high speed operation and perfect seed placement make it an ideal choice for farmers and contractors. The Plus model enables fertilising with one pass, seed bed preparing and seeing. The trailed DG II drill delivers effective sowing, high capacity and precise seed output with a working width of up to 12m and hopper capacity of 6,000 litres, enabling 140ha output per day.

uk.kverneland.com

perfect drill to support you through the evolution from reduced tillage through to direct drilling, it's even possible to use it as part of a conventional system.

Its low disturbance disc coulter and press wheel not only ensure minimal weed seed germination, they also keep hp requirement to a minimum.

Available in working widths from 3m - 8m, a 6m EasyDrill typically takes 200hp to pull which reduces fuel consumption and damage to the soil structure.

To cope with intensive use, Sky have re-designed and improved

the HD seeding line. This has reduced the cost of ownership through the introduction of fewer and more easily replaceable wearing parts which last longer.

The Sky MaxiDrill enables drilling on ploughed, deep and shallow cultivated soil and, in good conditions, directly into uncultivated soils.

C&O will be hosting a Sky EasyDrill spring demonstration. Please talk to your C&O sales rep if you are interested in attending.

SHELBOURNE REYNOLDS CELEBRATE 50 YEARS OF MANUFACTURING EXCELLENCE

Shelbourne Reynolds epitomises home grown manufacturing excellence. The Suffolk based company was founded in 1972 by Keith Shelbourne and built on the heritage of Reynolds Engineering to create the company we know today.

The factory at Stanton near Bury St Edmunds employs 150 people and utilises cutting edge manufacturing equipment. Most Shelbourne Reynolds products are designed and manufactured on site, and this close relationship between teams helps drive constant innovation and improvement of the product range. As well as enabling the team to deliver bespoke parts for specific applications, rather than relying on 'off the shelf'.

The Shelbourne Reynolds groundcare range of hedge & verge cutters and flair mowers are

industry leading machines designed for the most demanding of users, from farmers and contractors to councils and amenity users.

C&O's Kevin Cook said, 'Shelbourne Reynolds hedgecutters are superb, hard-wearing products, that will give a high-quality finish. They are powerful and reliable machines that will give you many years service.'

400 SERIES

Two models with 5.0m and 5.7m reach, fixed boom and 1.2m belt drive head.

600 SERIES

Two models, fixed 5.6m and telescopic 6.0m reach. Still compact enough for narrow lanes.

7000 SERIES

Choose between two models offering telescopic 6.0m and variable forward reach giving max. 6.2m, plus forward and backward reach.

8000 SERIES

Heavy duty range ideally suited to contractors. Lots of features in the 5 model range of 3 telescopic machines and 2 with variable forward reach and telescopic, giving incomparable flexibility and access.

C&O Construction

2022 was an exciting year at C&O Construction, we've delivered more units than ever before and have expanded our number of trained engineers, which means we're now able to support customers in Somerset alongside Dorset, Hampshire, West Sussex and Isle of Wight. We're also recruiting for another member of the construction sales team, to be based in the east of our territory in West Sussex.

We're looking forward to an exciting year ahead at C&O Construction. SANY have got a new telehandler, due to be launched to the UK market this year and C&O have a new **SY215C demonstration unit**. Please contact our sales team to arrange a demonstration.

C&O were delighted to supply **Express Hire** in Poole with 5 new SANY SY50 zero tail swing mini excavators. With SANY's 5 year/3,000 warranty Sany excavators make the perfect machines for the hire market. Express Hire now run 15 SANY units in their hire fleet.

The range of manufacturers we work with has been enhanced to ensure that all aspects of your machinery needs are supplied. This includes stocking a range of 9x4 and 10x5 beavertail plant trailers by **Indespension**, to ensure you are always able to drive away a new mini excavator.
