

C&O CONSTRUCTION NEWS SPRING 2025

SY26U NEW & IMPROVED

Responding to customer feedback, SANY have improved the already popular SY26C. Upgrades include increased platforms stability & controls.

- **Zero tail swing mini excavator**
- **Easily towable with secure tie down points for safe transportation**
- **5 year warranty for complete peace of mind**

Boom Steering has now been moved from a foot peddle to button steering, giving the operator more foot room and control over the vehicle thanks to its user-friendly design.

Moving to a **joy-stick steering system** allows for smaller more precise movements, making delicate work in confined spaces easier.

There are **styling improvements** to the interior including new plastics on the machines interior and an upgraded seat.

Changes to the main subframe, shift the centre of mass backwards, making a **more stable base**. This gives the operator increased confidence, whilst providing greater control and precision.

SY80U UPGRADED FOR 2025

SANY has released the reworked SANY SY80U compact excavator. Based on the successful 8-tonne machine, this new advanced version is designed to deliver enhanced **operator comfort** and productivity. The new model features a new optional **two-piece boom** with increased reach and control, making it ideal for applications such as groundworks, drainage and preparing trenches for utilities.

The new SY80U also comes with a next generation cab with the highest levels of comfort to ensure that the operator can achieve **maximum productivity** while working. Highlights include an upgraded, ergonomic and comfortable air suspension operator's seat and a new sleek and intuitive 7" touch screen display that has been designed with high performance and ease of use in mind.

Contact the C&O Construction sales team for competitive prices on these new models and the full SANY range of excavators, telehandlers and wheel loaders.
